RAPID PROGRESS ON COLLEGE WORK

New Plant at Westhampton Will Startling to Hear Laughter or a Be Ready for Occupancy Next Year.

Outlay of One Million Dollars for Great Educational Institution.

construction of the group of buildings for Richmond College. Every advantfor Richmond College. Every advantage is being taken of the bright summer weather to bring forward the work, so that all will be in readiness for the opening of both male and female colleges in their new quarters in September, 1914, just one year from this time.

Contracts now outstanding aggregate \$650,000, and the plant, with grounds ready for use, will represent an outlay of approximately \$1,000,000. The average weekly pay roll for the workmen now employed on the job acceptable for the workmen now employed on the job acceptable for the specific part of the contract specific parts in the current. The faster the spark the higher the notes produced. This frequency can be varied, particularly with a rotary spark-gap, and so music is produced.

The human voice has been sent distinctly, without wires, 400 miles, from Brant Rock to New York, and 200 miles from the Eiffel Tower, Paris.

The British Admiralty is experimenting with wireless voice transmission. A wireless receiving apparatus has been constructed that will fit in a cigar box. The rail of a bedstead has been used as an aerial.

The average weekly pay roll for the working now employed on the job exceeds \$10,000, and the architects and contractors say that with the present force, everything will be ready for the opening, giving old Richmond College just one more year in its present lege just one more year in its present buildings at Grace and Ryland Streets.

The Administration Building, the keystone of the group, and the last of the big structures to be placed under contract, now has its walls rising above the first floor. It will contain the library, lecture rooms and president for the library of dent's office, and will cost \$125,000. The architect's report shows it to be one-third finished. Two dormitorics, which will be made up entirely of students' rooms, are being erected at a total cost of \$190,000, and are two-thirds completed.

A complete college in one building will be occupied by the weman's college, which is being erected at a cost It contains lecture rooms, studios, dormitories, living rooms, rerequirements of a modern instifor women, together with a num. This building is nine-

Excavations and foundations for the ing halls, with a scating capacity of 110 each, with kitchens, servants' quarters, cold storage and superinrendents' apartments. Athletic fields, with a reinforced concrete stadium, have been fixed up at an approximate

Central Heating Plant.

The power-house, which will contain the central steam heating plant, the electric light generating plant, and provide the power for operation of the buildings, is yet to be started. Plans are it hand, and work will begin shortly.

the college postponed the erection of these buildings, preferring to go forward with those immediately needed, and to keep all construction of the best type, the others to be added from time to time as the funds of the college justify. awarding contracts for the

In awarding contracts for the group now under construction the split contract system was adopted, there being no general contractor, the college saving the profits of construction by awarding its contracts direct to the various classes of builders. The principal contractors now at work on the campus are Harwood & Moss, the Fulton Brick Works, the Wise Granite Company, Batkins, Hicks & Slaughter, R. L. Peters, the C. Manning Flumbing Company, the Crittall Casement Company, the Economy Concrete Stone Company, the Evans Almarel Company, and the Richmond Engineering Company.

gincering Company,

At Work of Grounds.

The street car loop at Westhampton has already been moved across the grounds, so as to enter the college grounds, so as to enter the college grounds just back of the athletic stadium. The permanent roadways have been cut and steps taken toward beautifying the grounds, work which will be pressed as soon as the builders get their material out of the way.

Actual construction work, after years of planning and financing, began in July, 1912, a spur railway track from the Chesapeake and Onio, River Division, having been constructed for

Division, having been constructed for more than a mile to bring material directly into the grounds. The contract is to be awarded in a few days for laying the pipe main out Patterson Avenue, which will supply the col-lege with city water, the supply main to cost about \$20,000, and he nearly three miles long. Permission for the connection has already been granted by the City Council.

on New Sweethcart.

Pottstown, Pa., August 30.—Not every girl around Stowe, this borough's lively western and suburb, can get a husband as easily as Miss Elizabeth Petzer has demonstrated her ability to do.

Early this week her first prospective husband was arrested here and taken back to Homestead to answer a serious charge. A marriage lifense had been issued for his marriage to Miss Petzer.

Yesterday the younk woman appeared before Magistrate J. M. Neiman and asked that the name of her first lover he scratched from the license and that of John Husner, 43 Chesthut Street, this borough, be substituted for it.

The squire told her that a new license was necessary. This was procured, and unless something unforeseen happens, the wedding will come off next Sunday.

How to Get

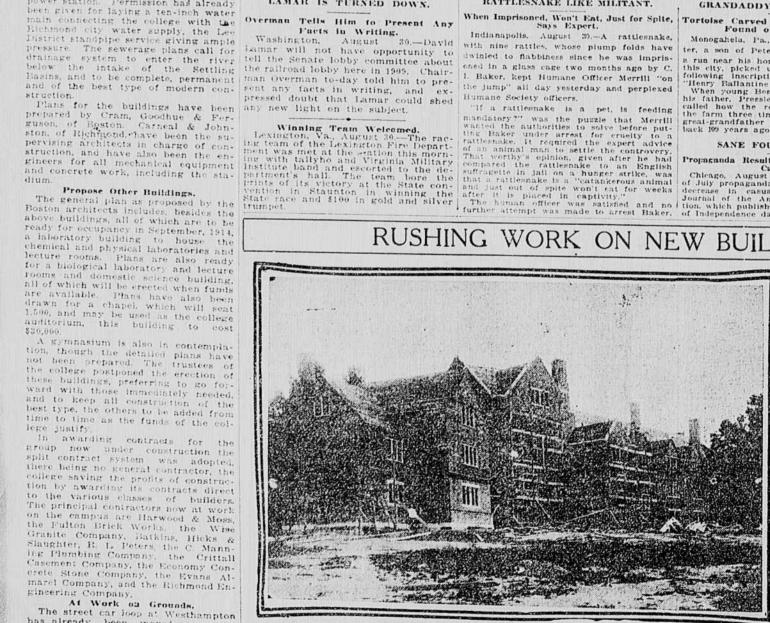

If you bruise your hand, you will notice that a scab forms, and when it falls off, new skin has formed. Did salve do it? No! Skin is the same as muscle, bone, sinew, ligament. All are made from the blood, from the materials that your stomach and intestines convert from food into what we call blood. And this blood circulates in the myriad of tiny blood vessels in the skin. Start from your stomach, where blood materials begin, and it won't be long before you are free of eczema. Use S. S. S. for a short time, and not only will eczema disappear, but the entire blood will be renewed. There is one ingredient in S. S. S. If you bruise your hand, you will no-There is one ingredient in S. S. which serves the active purpose of stimulating each cellular part of the body to the healthy, judicious selection of its own essential nutriment. That is why it regenerates the blood supply; why it has such a tremendous influence in overcoming ecogons.

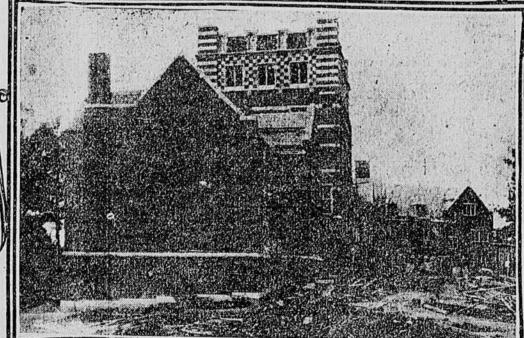

why it has such a tremendous influence in overcoming eczema, rash, pimples, and all skin afflictions.

Get a bottle of S. S. S. at any drug store, and you will not only feel bright and energetic, but you will be the picture of new life. S. S. S. is prepared only in the laboratory of The Swift Specific Co., 189 Swift Bidg., Atlanta, G2. Beware of any attempt to sell you something "just as good."
